

# EcoBest™ CMW Cleaner/Degreaser Installation Guide

## EcoBest™ CMW Cleaner Degreaser Concentrate Advantages:

- Penetrates & Lifts
- Heavy Duty Cleaner
- Multi-Surface Use
- Virtually Odorless
- Neutral pH
- No Caustics or Alkalines
- Biodegradable
- Bio-Based Ingredients
- No V.O.C.'s

**Typical Cleaning Uses:**  
Patios, Driveways, Garage  
Floors, Decorative Con-  
crete, Wood Floors, Wood  
Fences, Tile, Sidewalks,

Manufactured By

Made in the U.S.A.

EcoBest™ Concrete, Masonry, & Wood Cleaner/Degreaser is a powerful eco-friendly biodegradable cleaner that has incredible grease cutting ability required for difficult cleaning tasks, yet contains no butyls, abrasives, or alkalines. EcoBest's™ advanced bio-based technology penetrates through contaminants to break the bond for an easier and more thorough removal rather than dissolving them which can leave difficult to remove residue. Additionally, our neutral pH is safer to use on virtually all substrates and makes it a preferred maintenance cleaner that won't damage coating finishes.

**PRODUCT USE:** Ideal for home, construction, industrial, automotive, marine, and commercial cleaning tasks. Safely cleans oils, grease, liquid stains, dirt, graying wood, stripper and other chemical residues. It is safe to use on concrete, masonry, stone, tile, wood, vinyl siding, laminates, gelcoats, canvas, metal, fabric, upholstery, and more.

**DIRECTIONS:** First remove excess surface oil and grease spills. Sweep or scrape all loose contaminants. Test a small area to ensure product performance. Protect vegetation if applicable by dampening the area with water and cover with a drop cloth.

**DILUTION RATIOS:** Heavy Degreasing: Full Strength to 1:1, Medium Cleaning: 2:1 to 3:1, Light & Maintenance Cleaning: 4:1 to 5:1. Always use clean water. 1 gallon at full strength will yield approximately 150 sq.ft. and a dilution of 5:1 (6 gallons) will yield approximately 900 sq.ft.

**APPLICATION:** Surface Cleaning for Concrete, Masonry, & Wood: Prespray solution on the surface area with a garden type sprayer, watering can or powerwasher prespray setting, then allow to dwell for 1-2 minutes. For heavy oil and grease allow a dwell time up to 5 minutes. Clean and rinse with a stiff bristle brush or use a powerwasher. Light & Maintenance Floor Cleaning: For smooth surface floor cleaning simply place the diluted solution in a mop bucket for typical mop cleaning application. No rinsing required. Great results are found by using a microfiber mop system. For textured or exterior cleaning, place the diluted solution in a bucket and clean with a firm bristle brush or use with a powerwasher.

**CAUTION:** Surface may become slippery when wet.
